SiteWorx Area

Observe Asset Location, Occupancy, and Activity

Date: _____

Quantity: _____

Company: _____

Project: _____

- Enables you to monitor the location of important assets and study occupancy and space utilization trends in critical areas of your facility — or your entire facility

- Helps you optimize your facility floorplan by understanding the flow of equipment, goods, or people. And it can help you find, track, and count key assets

- Reduce downtime and unnecessary costs by monitoring the location of equipment or other important assets

- Use virtual boundaries to monitor the location of assets and receive notifications when critical equipment is out of place

- Use valuable space smarter by knowing specifically how each space is used

- Ensure safety and monitor access to unauthorized areas

Part of the SiteWorx® Facility Insight applications suite, **SiteWorx Area** uses integrated occupancy sensing and asset detection to take a closer look at critical areas of your facility. SiteWorx Area delivers detailed, anonymous occupancy data that can spot areas of high congestion, a potential health issue. It helps you optimize your facility floorplan by understanding the flow of equipment, goods, or people. It helps locate important assets throughout the facility and monitor the location and position of mobile equipment, tools and resources.

No matter what SiteWorx application you choose, you can be sure that it's easily connected, completely secure, and simple to expand thanks to the **SiteWorx Wireless Mesh** core technology platform. The wireless mesh provides a robust array of advanced capabilities that keep SiteWorx applications open, connected, scalable, and secure — and easier to use, manage, and evolve. SiteWorx applications can be installed quickly and start delivering meaningful data and actionable insights right out of the box.
